Who is eligible for access to the Campbell Library?

Those who have a current Campbell faculty appointment and who are actively working with Campbell students and programs.

What is the process for getting a library account?

New appointed faculty member will receive instructions for applying for a library account along with his or her appointment letter.

Existing external appointed faculty members that does not have access should call (910-893-7700) or email the medical library (medicalibrary@campbell.edu) to check and see if an account has been set up for them. If no account exists, the faculty member will receive directions on how to apply.

How long does it take to get a library account?

Typically 5 to 10 business days.

Do the library accounts include an email address?

Not at this time. This can be revisited if enough external faculty are interested.

How do external faculty reach their resources?

For the convenience of external faculty, all of their available resources are centralized in one site: http://guides.lib.campbell.edu/communityfaculty.

Add this site to the home screen of any mobile device for easy access. It is also linked on each rotation and resident libguide on the medical library’s home page under the “Faculty” tab.

For a list of available resources, turn this sheet over.

Why can’t external faculty use UpToDate?

For legal reasons, Campbell is not able to extend its academic license for UpToDate to external faculty. Facilities are encouraged to contact UpToDate to explore a subscription for their facility.

The resources extended to external faculty include access to excellent products produced by UpToDate competitors Essential Evidence Plus and DynaMed Plus – both of which can be used on phones and tablets. The medical library would be glad to provide training on these products for your faculty.

What about journal articles?

Thousands of current full text articles are available through Clinical Key, LWW Total Access Collection and other Campbell resources. Contact the medical library if you cannot access an article and the medical library will locate or request it for you at no charge.
Resources made available to CUSOM external faculty include:

**AccessEmergency Medicine**
AccessEmergency Medicine contains Emergency Medicine textbooks and procedural videos, a diagnostic self-assessment for exam prep, and a number of other helpful tools for medical students.

**AccessMedicine**
Access Medicine provides access to more than 75 medical titles from McGraw-Hill, with regularly updated content, thousands of images and illustrations, interactive self-assessment, case files, diagnostic and point-of-care tools, a comprehensive search platform, and the ability to view from and download content to a mobile device.

**AccessPharmacy**
Access Pharmacy allows users to select a core curriculum topic, browse by organ system, review textbooks, search across leading pharmacy online references and view optimized content on a mobile device.

**AccessPhysiotherapy**
AccessPhysiotherapy provides access to resources for physical therapy students, educators, and those in practice seeking to maintain certification.

**AccessSurgery**

**Bates Guide to Physical Examination (Video Collection)**
Now in its Fifth Edition, Bates’ Visual Guide delivers head-to-toe and systems-based physical examination techniques for the (Advanced) Assessment or Introduction to Clinical Medicine course. The site features more than 8 hours of video content.

**Clinical Key**
Upgraded and expanded from MD Consult, this point-of-care research and "clinical insight engine“ contains hundreds of Elsevier's medical books, textbooks and very current journals, Procedures Consult's procedural videos, the First Consult POC interface, additional videos and images, practice guidelines, patient handouts, and drug information from Gold Standard.

**Diagnosaurus**
Available through App Store and Google Play. Set up your own account within the product before attempting mobile access.

**DynaMed Plus**
DynaMed Plus is a point-of-care clinical reference tool that includes more than 3,400 topics covering diseases, conditions, drugs and more. Created by physicians for physicians, DynaMed strives to provide current information with validity, relevance and convenience.

**Essential Evidence Plus**
A reference for clinical decision making, EE+ features over 13,000 topics, guidelines, abstracts, and summaries that cover the most common conditions, diseases, and procedures clinicians encounter. This clinical reference tool was designed for use by physicians, nurses, and other health care professionals on the frontline of patient care.

**LWW Total Access Collection**
The Lippincott Williams & Wilkins Total Access Collection is a collection of over 310 journals targeting a variety of medical information needs, including various specialties of medicine as well as nursing and bioscience.

**NEJM Journal Watch**

**TripPro (Turning Research into Practice)**
TRIP (Turning Research Into Practice) Database is a clinical search engine quickly and easily searches high-quality research evidence to support evidence-based practice. In addition to research evidence, the TRIP Database can be used to search other content types including images, videos, patient information leaflets, educational courses and news.
